1 Program and module description

The *infra* **CONVERT** software enables users in the manufacturing industry to create test plans based on technical drawings in a 2D CAD exchange format, in the form of a PDF file or raster graphic. Numerous functions help the user to incorporate features into the inspection plan, based on the drawing entries, and manage them. The management is supported by a dynamic linking of the inspection features with stamp markings on the drawing. Inspection plans and stamped drawings can then be issued in common formats.

The following software scopes are currently available:

infra **CONVERT** (basic version)	Allows processing of DWG and DXF 2D CAD file formats as well as PDF, TIF, JPG, BMP, GIF and PNG file formats.
infra **CONVERT** Pro (Pro version)	Includes advanced graphical drawing comparison and automated stamping of vector-based PDF files.
Modul IGES (Additional module for basic and Pro version)	In addition, 2D CAD files can be processed in IGES format (IGS, IG2, IGES).

2 License model

The licenses acquired are multi-user licenses ("floating licenses"). Only the maximum number of copies may be in use as licenses were acquired. The licenses apply across locations or plants. They may be used across locations. A software-based copy protection system is used for the monitoring.

3 Software protection

The software comes with a copy protection system. For this a license service is used, on which the acquired licenses are released. For multi-user licenses, the license service must be installed on a central computer/server, which can be reached via a network from all workstations.

4   Maintenance Contract

A maintenance contract can be concluded for the software. The maintenance contract includes the delivery of the current version of *infra* **CONVERT** with the purchased modules and support by telephone and e-mail.

- The cost is 15% of the value of the acquired software licenses per year.

- The maintenance contract begins with the installation of the software by ELIAS GmbH or a partner (date of the transfer protocol). If the software is installed by the end customer, the maintenance contract begins with the delivery of the software to the customer (date of the delivery note).

- The conclusion of a maintenance contract is only possible on the basis of the current software version. If the contract is to be concluded later, an update may need to be purchased first. The value of the acquired software licenses is determined according to the currently valid price list.

- Billing takes place for twelve months in advance.

- The maintenance contract can be terminated with a notice period of three months at the end of the contract by both parties.

- The contract is valid for twelve months and is automatically renewed for another year if it is not terminated in time and in writing by ELIAS GmbH.

5   Update

It is also possible to purchase an update for infra CONVERT without a maintenance contract. For the update, 2 % of the license fee will be charged for each full month between the time of the purchase of the software and the purchase of the update. After 24 months, the claim for an update expires.

6   Extension

The extension of existing *infra* **CONVERT** licenses by further licenses or modules is only possible on the basis of a current software version. If there is no maintenance contract, it may be necessary to first obtain an update to the current software version.

If a maintenance contract exists, the extensions are automatically included in the maintenance contract and the fees are adjusted accordingly.

Additional modules can be purchased at any time at the prices listed in this price list. For multiple licenses, the same modules must be purchased for all licenses.

For additional licenses, the difference to the already purchased licenses will be charged. Here, the prices of the already acquired licenses are always determined on the basis of the currently valid price list.

7 Performance limitations

Software features are significantly dependent on the quality of the CAD replacement files. Defective drawings or missing drawing information may be subject to restrictions which are not the responsibility of ELIAS GmbH. As a reference for assessing the quality of DXF and DWG files, the Autodesk AutoCAD version 2016 will be used without additional applications.

In contrast to 2D CAD exchange files, no feature information can be automatically read from graphics files (TIF, JPG, BMP, GIF, PNG). These restrictions are justified in the file format and are not to be answered by the ELIAS GmbH.

8 Prices

The prices for the licenses are graduated prices. This means that the more licenses a customer buys, the cheaper the individual licenses. The following tables show the unit prices for *infra* **CONVERT** licenses and the extension modules.

All prices are in Euro, are net and exclusive of VAT.

8.1 *infra* CONVERT

Art.-Nr. IC4100

Prices per license, based on the number of licenses:

Item	Number of licenses									
	1	2	3	4	5	6	7	8	9	≥ 10
infra **CONVERT**	2,100	1,890	1,750	1,625	1,510	1,410	1,320	1,230	1,140	1,050

8.2 *infra* CONVERT Pro

Art.-Nr. IC5100

Prices per license, based on the number of licenses:

Item	Number of licenses									
	1	2	3	4	5	6	7	8	9	≥ 10
infra **CONVERT** Pro	3,100	2,790	2,580	2,400	2,230	2,080	1,950	1,820	1,680	1,550

8.3 Modul IGES

Art.-Nr. IC6200

Prices per license, based on the number of licenses:

Item	Number of licenses									
	1	2	3	4	5	6	7	8	9	≥ 10
Module IGES	900	810	750	700	650	610	570	530	490	450

8.4 Upgrade to *infra* CONVERT Pro

Art.-Nr. IC8100

Prices per upgrade license, based on the number of licenses:

Item	Number of licenses									
	1	2	3	4	5	6	7	8	9	≥ 10
Upgrade to *infra* **CONVERT** Pro	1,000	900	830	775	720	670	630	590	540	500

8.5 Overview of the total prices

Prices for items and item combinations, depending on the licenses purchased:

Articles and article combinations	Number of licenses									
	1	2	3	4	5	6	7	8	9	10
infra **CONVERT**	2,100	3,780	5,250	6,500	7,550	8,460	9,240	9,840	10,260	10,500
infra **CONVERT** Pro	3,100	5,580	7,740	9,600	11,150	12,480	13,650	14,560	15,120	15,500
Module IGES	900	1,620	2,250	2,800	3,250	3,660	3,990	4,240	4,410	4,500
infra **CONVERT** + Module IGES	3,000	5,400	7,500	9,300	10,800	12,120	13,230	14,080	14,670	15.000
infra **CONVERT** Pro + Module IGES	4,000	7,200	9,990	12,400	14,400	16,140	17,640	18,800	19,530	20,000
