

Important uses

With our products we support your:

- Quality test planning and initial sampling
- Initial part release in production areas or measuring rooms
- Incoming goods inspection with mobile devices
- SPC – Statistical process control

Partnerships with more than 20 CAQ, MES, ERP, system houses.

More than 5,000 users from the sectors:

- Automotive industry
- Machinery and plant engineering
- Medical engineering and pharma industry
- Aerospace
- Security technology
- Electrical engineering

The indispensable tool to manage your measurement data

Record measurement data quickly, securely and with traceability.

- Transfer measurement data from any gauge to any software, regardless of the type of connection.
- Channel any number of gauges at a measuring station.
- Read out measurement data, e.g. from dial gauges with a trigger pulse.

Reliable management of your measurement data

Received at the device interface

- Digital measurement value
- Measurement device or transmitter ID, battery condition

Transferred to the respective application

- Individually formatted measurement data (e.g. measurement value + time stamp + ID + self-specified name)
